Biomedical Engineering

Bachelor of Science/Master of Science
## 5-year Combined Degree Program

In a world with a growing demand to enhance medical care with technology, our accelerated 5- year BS/MS program allows you to earn a Bachelor's and Master's degree.

This program is designed for highly motivated BME students who would like to enter the industry in a higher-level position following graduation, or for students who would like to pursue higher education in biomedical engineering.

How it works

Nine overlapping and qualifying credit hours taken during the senior year will satisfy both undergraduate and graduate programs for a reduced total of 151 credits at graduation.
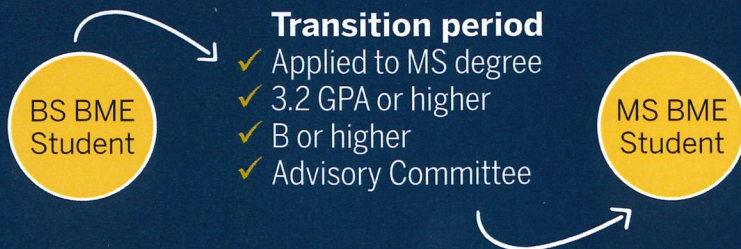

A thesis option is available. However, it may require additional semesters, depending on the nature of the selected research.

Requirements

- Must be of junior standing in the BME Department

- Earn a minimum GPA of 3.2 for the first 85 credit hours of coursework that apply towards the BS BME degree

- Maintain a B or higher in all courses that will be transferred to the MS BME degree

- Students must form a personal Academic Advisory Committee after admission

- In order to graduate with a combined degree, students must also submit a formal application to the MS BME program upon completion of the BS BME degree

How to apply

Transition period
- ✓ Applied to MS degree
- ✓ 3.2 GPA or higher
- ✓ B or higher
- ✓ Advisory Committee

To apply to the 5- year BS/MS program, students should submit the Declaration of Intent to Pursue the Combined Degree no later than February 15th of the spring term preceding initial enrollment in BME 49100 Biomedical Engineering Design I.

DEADLINE TO APPLY IS FEBRUARY 15TH
